W GOODS.

Our stock of Dry Goods, Millinery and Notions for spring and summer is now very full and complete. The purchases were made by Mr. Ayres in person, who remains in New York the entire season and buys only when the goods are the right kind and quality, and the prices are the right kind and quality, and the prices are the very lowest that cash can obtain. To farmers and mechanics we can offer the best goods in the market at prices as low as any house in the west, and that very few houses can dupli-cate. Come and see for yourself.

FINANCE AND BUSINESS

LUMBER BUSINESS.

GREAT FALLING OFF. The special correspondent of the Inter-Ocean from Bay City, and one evidently in Saginaw lumber business. He says: There Corn-Very dull. Clear yellow and high have been a limited number of lumber mixed, shelled in elevator is quoted at 63@65c; buyers in this market within the last few weeks, and some good sales have been made, but nothing like the usual spring activity has prevailed. The lumbermen generally attribute the stagnation to the uncertainties which have so long hung over the financial question in Congress. With remarkably few exceptions, these men cannot see how relief is to come from an aggravatian of the present difficulty which they think is a lack of sufficient currency to do the business of the country. So, at a time when business should be lively our lumbermen are standing idle, waiting for some better fortune than has yet come to them. Nearly all the mills on the river bave a greater or less stock of logs in the boom-enough to start up with. There are not less than 35,000,000 feet of logs in the various mill-booms, and some computations reach a much higher figure. An unusually large quantity of logs was left in the Tittabawasse river boom, which is the main source of supply, and these will, of course, be at once available for the mills. Everything necessary for an early start is therefore present, except a demand for the lumber, which has not yet come. The amount of lumber left on docks unsold last fall was about one hundred million feet, with about sixty mil-lion feet besides, which is in the hands of lion feet besides, which is in the hands of mill owners who ship to their own yards in the various lower lake ports. This large amount of stock on hand crowds many of the docks, and some of them must which are from 1 to 2 cents higher: many of the docks, and some of them must ship before they will have room for this year's product. An ordinary demand and the usual shipments would soon clear away the glut on the docks, and this is the only glut there is likely to be this year, for the stock of logs for the season's sawing is very short. The winter's logging was laid out on a very small scale last fall, for lumbermen had neither the means nor the courage to go into the woods for a full winter's work. The common runty of the course actual operations, however, were curtailed even beyond the calculations. Except on the Au Gres, the Rifle, and some other of the streams which empty into Saginaw bay, the winter has been an exceedingly unfavorable one for lum-bering, and the almost universal report is that the operators have fallen short of their intended crop from one-third to one-half. On the streams which send their logs into the Tittabawassee river, for instance, where the Tittabawassee river, for instance, where the yearly product of logs is usually counted by hundreds of millions, not more than 75,000,000 feet have been put in the past winter. On the Cass, also, which had been furnishing for the two previous winters about 100,000,000 feet, it is computed that 30,000,000 feet will cover all the operations last winter. The shortage in logs may be seen by the following carefully prepared estimate

\$2.25 per barrel.

CANNED GOODS—Are in large demand at former prices. Tomatoes, 21bs., \$1.75; 31bs., \$2.40g.

25.50g.3 25; strawberries, 21bs, \$2.75; green peas, 2 lbs, \$2.50g.3 25; string beans, \$1.75g.2; salmon, 1 lb, \$2.75g.3; ditto, 2 lbs, \$4.64 25. by the following carefully prepared estimate of the amount which it will be possible to get to the river mills if the season gives a better running stage of water in the various streams than is usually had. With such a running season, there are the following

No new features have been deloped in this market, and trade continues good. Assafœtida is quoted at 40@45c; alcohol at \$1 90@1 \$5, alum, per pound. 45@55c; camphor, per pound 40@45c; cochineal, per pound, 90@95c; chloroform, per pound, \$1 20@1 25; copperas, barrels per pound. 2@3c; cream tartar, pure, 45@47c; indigo, per pound, \$1 20@1 30; licorice, Calab, per pound, genuine, 45@50c; magnesia, carb, 2 oz, per pound, 30@40c; morphine, P. & W. ounce, \$5 75@6 00; madder, per pound, 16@18c; ofl, castor, No. 1, per gallon, \$2 15@2 25; oil, bergamont, per pound, 86; opium 88 25 to 8 56; quinine, \$2 55@2 70; soap, castile, fr., 14@16c; soda, bicarb, kegs, per pound, 7@8c; salts, epsom, per pound, 4@5c; snuff. Garrett's pack, per gross, \$17; snuff, Garrett's, per case of 4 dozen, \$16; sulphur, flour, per pound, 5@6c; saltpetre, per pound, 10@25c; turpentine, 55@60c. From the Tittabawassee, 65,000,000 38 000,000 35,000,000 From the Rifle. om Bad River and Beaver Creek. From Swan Creek From other shore streams In the estimates above are included all the logs left over in the streams last fall. For

AMOUNTS OF LOGS

Which may come to the mills from the

instance, the calculation for the Tittabawassee river is made thus: The best information to be obtained from the boom company and log owners makes the amount of old logs in the river 230,000,000. To this I have added two-thirds of the new crop-more than is likely to come down-and the total is 280,-000,000. There are about twenty million old logs in the Cass, and about thirty million new are reported. But as there are always numerous small lots put in along this stream and not usually counted among the regular operations, I have added 5,000,000 feet to the old and new stocks reported. The computations for the other streams are made in the same way, but it is not necessary to give details in each case. The prospect of running the logs into the main streams and to the mills are old logs in the Cass, and about thirty million

not generally favorable. The shore streams, probably nave a little difficulty, as over most of that region there is still a large quantity of snow. In the country drained by the Tittabawassee and its tributaries, the snow has gone and there is nothing to describe the country drained by the Tittabawassee and its tributaries, the snow has gone and there is nothing to describe the country drained by the Tittabawassee. best; it comes in a day, and is gone usually before the men have broken the roll-ways on the head-waters. A freshet subsides on the Tittabawessee, the Cass, etc., in half the time it did fifteen years ago—a fact due to the denudation of the country of its forests. In the above table are calculated all the logs which can come out if there be a season of enough rain to raise the streams and keep them up. It would take an unusual quantity of rain to do this. The probabilities are, therefore, against the above amount of logs coming to the mills, and the figures must be taken as the outside limit. The other extreme, or the lowest amount to which the product of our lumberamount to which the product of our lumber-ing streams may be reduced this season, is pounds. The scale of prices of coal is as follows: estimated by good judges at 200,000,000 feet, counting old and new logs, as in the other calculation. Two hundred millions, it may be safely asserted, are sure to come to the mills. Above that figure, the uncertainties of log running came in The extent of the shortage may be seen when it is stated that the shipments of lumber from the river last year footed up nearly five hundred million feet, and it was called a very bad season. The capacity of the mills on the river is over eight hundred and eighty million feet for the ordinary sawing season, counting 12 hours' work to the day So it will be seen that even if all of the 443, 000,000 feet above estimated should come down, it would be only enough to busy the mills to the extent of half their capacity.

RAILROAD CONSOLIDATION. THE KANKAKEE AND P., C. AND ST. L. TO POO. THEIR EARNINGS-MEETING OF THE MAN-AGERS OF THE TWO LINES-NEW TARIFF OF FREIGHT RATES-OTHER MATTERS OF IN-

A meeting of the managers of the Kankakee and the Pittsburgh, Cincinnati and St. Louis railroads was held in Chicago last Wednesday for the purpose of entering into an arrangement to pool their earnings. The follow gentlemen were present : E. H. Waldron, general superintendent of the Cincinnati, Lafayette and Chicago railroad; H. J. Page, general freight and ticket agent of the Indianapolis, Cincinnati and Lafavette railroad; John Egan, general passenger agent Indianapolis, Cincinnati and Lafayette road; B. Lyman, general passenger agent Cincinnatti, Lafayette and Chicago railroad; J. B. Reed, general freight and Samuel Stevenson, general ticket agent of the Cincinnati, Hamilton & Dayton Railroad; W. Stewart, general freight agent Pittsburgh, Cincinnati & St. Louis Railroad; F. H. Kingsbury, assistant freight agent: E. Gallup, general western passenger agent of the Kankakee Line: L. D. Richardson, contracting agent of the Pittsburgh, Cincinnati & St. Louis Railroad, and J. K. Demings, freight agent of the Kankakee Line. Mr. Waldron stated that this mode had become necessary on account of the continued decrease in the receipts of the two lines. By making this consolidation, expenses will be greatly reduced, and the facilities of both roads largely increased. The arragement to unite both lines under one management was decided upon, and Mr. L. D. Richardson, long connected with the Pittsburgh, Cincinnati & St. Louis Rail-was chosen as manager of the two interests, and assumed his duties April first, Mr. J. K. Demings, who has been the representative of the Kankakee Line freight interests in Chicago for several years, has been appointed contracting freight agent for both lines. Mr. E. Gallup, who has had charge of the ticket and passenger business of the Kankakee Line, will hereafter have charge of the business of both lines; his office remaining where it is now, at No. 121 Randolph street, Chicago. All freight contracts will have to be made at the office of Manager Richardson, at No. 161/2 La Salle street, Chicago. It is intended to close, as soon as possible, all the outside ticket offices of these lines, and sell tickets only at the gen-eral office in Chicago and at the depots. No change has been made in the passenger rates. The two freight lines, which have been consolidated into one, will hereafter be known as the Green line. Shippers will have the choice to ship via either of the roads. The manager, Col. Richardson, has arranged the following new tariff, which differs but little from the old one of the Kankakee line.

THROUGH RATES FROM CHICAGO TO	First class, cents	Second class, cents	Third class, cents	Fourth class, cents	Flour per brl	risk, per 100 lbs	per 100 lbs load ,	Hogs and cattle, per car load, released	Miscellaneous
